

## Individual Lessons: intensive one-to-one tuition tailored to the student's language priorities

Our individual lessons perfectly complement the group programme:

- Each 60-minute lesson is tailored by our skilled teachers to meet the student's exact language needs and priorities
- An intensive, one-to-one focus that boosts students' confidence, allowing them to make maximum progress
- Lessons can target any area of language learning, for example grammar, vocabulary building, listening skills, essay writing or pronunciation
- Lessons can also focus on subject-specific content such as English Literature or History
- We are flexible on the number and frequency of the lessons so students can tailor them around the rest of their programme

Our Individual Lessons have received an average score of **9/10** from our students!

### Case Study 1: A Grammar Focus

Student A was an extremely fluent English speaker, who had never learned formal grammar. He was worried about getting good grades in his school-leaving exams.

We used his individual lessons to work extensively on his grammar, filling in gaps in his knowledge and then giving him new, more advanced structures.

*"I think that my English level and my skills improved a lot."*

### Case Study 2: A Literature Focus

Student B was preparing to study at an English university. She wanted to concentrate on English literature so she could discuss texts comfortably with native English speakers.

Before her stay, we selected key books from her reading list. During her individual lessons we analysed them together, helping with both her spoken and written language skills.

*Student B gave her Individual Lessons a score of 10/10.*

### Case Study 3: A Fluency Focus

Thirteen-year-old Student C had been learning English for a year. His basic grammar was good, but he found it difficult to have a conversation in English.

In his individual lessons, Student C practised the English he needed for everyday situations. He also learned how to start and continue a conversation in English with his friends.

*"I want to come back next year. It's a really good school with really good teachers."*
